

What is a State Level Court Record?

Saved From: <http://www.trudiligence.com/faq/article.php?id=63>

This system provides an interface to upper and lower level county courthouse records across the entire state. These courts typically will hear Felony charges and most Misdemeanors. Municipal / City level courts may or may not be included and this Municipal coverage will vary by jurisdiction. Real time record searches are conducted by the user directly at the TruDiligence website and results are returned instantaneously. Non real time searches are conducted by TruDiligence and results are summarized into a report for your convenience. Searches are priced on a per name basis.
